Design Pitfalls: Identifying and Rectifying Common Website Errors

CLUTTERED LAYOUTS

1

An excess of elements on a page can overwhelm users and hinder information retrieval. Maintain a clean and organized layout.

SLOW LOADING TIMES

2

Large images, videos, or unoptimized code can slow down your website. Optimize images and use efficient code to improve loading times.

POOR NAVIGATION

3

Complex or unclear navigation menus can confuse users. Make sure your navigation is intuitive and easy to use.

Design Pitfalls: Identifying and Rectifying Common Website Errors

4

LACK OF MOBILE OPTIMIZATION

With more users accessing websites on mobile devices, it's essential to ensure your site is responsive and displays correctly on smaller screens.

5

IGNORING SEO

Not optimizing your website for search engines can make it difficult for users to find your site. Use relevant keywords, meta tags, and descriptive URLs to improve your site's SEO..

6

BAD TYPOGRAPHY

Hard-to-read fonts, small text sizes, or poor color contrast can make it difficult for users to read your content. Use legible fonts and ensure good contrast between text and background
